DETAILED ACTION

Allowable Subject Matter

1. Claims 4-11 are allowed.
2. The following is an examiner's statement of reasons for allowance (these reasons were set forth in the previous Office action but are reiterated herein):

Independent claim 4 recites a lithium secondary battery comprising a lithium ion conductive solid polymer electrolyte comprising a Si-N-Si bond in the polymer skeleton. JP 10-208747, the closest prior art, teaches a battery comprising an inorganic polymer with an -Si-Si-NH- repeating unit in Table 1. However, as disclosed in the abstract and paragraph 16, this polymer functions as an electron-conducting binder in the electrode. Since an electrolyte needs to be an electrically insulating material, the electrically conductive polymer of JP '747 is not capable of functioning as an electrolyte. Accordingly, claim 4 is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
